

Greetings,

I wanted to request that the FCC try to restrict ownership of the radio/television and public broadcasting stations in this country. One of the fundamental freedoms that makes the United States such a great country is the freedom of the press.

If our airwaves are owned by just a few corporations, than just a few corporations will be deciding what media people have access to. If there are more corporations sharing ownership, than more views can be heard.

This is of course what makes our democracy great.

please consider these views when making your decision on limiting ownership of our airwaves.

thank you

Tim Chng
